(TSX.V:ABRA; OTC PK: ABBRF) ("AbraPlata" or the "Company") announces that it plans to complete a non-brokered private placement through the issuance of up to 25,000,000 units ("Units") at a price of CAD\$0.08 per Unit (the "Offering"). Each Unit will consist of one common share in the equity of the Company (each, a "Common Share") and one share purchase warrant (each, a "Warrant"). Oculito Drill Program

The next phase of the drill program at Oculito is planned to begin in May 2020 and will consist of approximately 1,600 metres of diamond drilling in four holes. The drill campaign will continue to evaluate the potential for additional high grade gold and silver mineralization adjacent to and beneath the current mineral resources, as well as into the basement rocks. The campaign will consist of two step-out drill holes which are designed to follow-up on high grade intercepts encountered in holes DDH 19-002 and DDH 20-001 (see Company news releases dated [Jan. 27, 2020](#), and [Feb. 19, 2020](#)). The other two holes will be drilled further along strike to test for the eastern extension of the Oculito mineralized system.
